

Topic: Animals inc humans	Year 1 Age 5-6	Title: Animal group discussion
Working Scientifically		Conceptual Knowledge Focus identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals

Example: Group discussion about animals

At the beginning of the topic the children knew little about amphibians or invertebrates. By the end of the unit, the children could name animals in these groups and describe some of their features.

Children meeting the objective would be able to name some animals from each group and for some groups will be able to say why they belonged to that group e.g. frogs live on land and in water.

Example from Shaw Primary School, Melksham
