Key aims
To provide extra support to Teach First primary participants to improve their science subject knowledge, ensuring that they can raise their pupils’ achievement and aspirations in science.

Teach First will do this by delivering additional science CPD sessions alongside the Leadership Development Programme. Session content will be created in partnership with AZSTT.

Outcomes
Ten sessions will be delivered in each region to approximately 160 primary teachers. These teachers will, in turn, be able to improve the achievement and aspirations within science of approximately 4,800 primary school children in 2012/13.

Evaluation
Teach First’s Regional Training Providers will evaluate the success of the sessions to ensure continuous improvement of the CPD on offer.
