

Topic: Living things	Year 4-5 Age 8-10	Title: Animal teeth
Inquiry Focus I can engage with scientific and technological evidence (research)		Concept Context I can describe the features of organisms and recognise how they allow them to live, grow and reproduce for survival in their environment

canine
Dogs have long ^{canine} teeth so they can tear food. Dogs are carnivores that means they eat meat. ✓

DOG SKULL

Cows have long molars so they can grind grass. Cows are herbivores that means they eat plants. ✓

COW SKULL

Hamsters have long incisors to eat nuts. They are herbivores that means they eat plants. ✓

HAMSTER SKULL

✓ Good understanding!

Example
Having previously learnt about different types of teeth in humans. Children then identified different types of teeth in animals, linking this to their diet.

Children meeting the objective would be able to describe the link between teeth and diet.

Example from Johnston Community Primary School, Pembrokeshire, Wales
