

<b>Topic:</b> Light	<b>Year 5-6</b> Age 9-11	<b>Title:</b> Shadow plan
<b>Inquiry Focus</b> <b>Plan:</b> I can suggest suitable methods of inquiry (fair testing)		<b>Concept Context</b> By manipulating the properties of light, I can produce a desired effect

**Example**

Children were asked to plan an investigation into what might change shadow height.

Children meeting the objective would be able to plan a suitable method for carrying out the inquiry, for example being clear in their question/plan about which variables are being changed, measured and controlled.
