

TAPS Cymru Focused Assessment example

Topic: Materials	Year 5 Age 9-10	Title: Solubility venn diagram
Inquiry Focus Review: I can suggest conclusions as a result of carrying out my inquiries (group and classify)		Concept Context I can recognise that changes in materials affect their properties and uses under different conditions

Example

Children explored whether different substances (salt, sugar, flour, paprika, sand, pepper) dissolved in cold and/or warm water. This class presented their findings in a venn diagram.

Children meeting the objective would be able to group the materials into soluble and insoluble. They might present this in a table or in a venn diagram (as pictured).

Example from Blessed Carlo Acutis Catholic School - St. Mary's Campus, Merthyr Tydfil
