

Can you solve a bony puzzle?

Ages	Subject	Topics	Resources
3-5 years 5-7 years	Science Geography	Fossils Rocks	Dinosaur bone images from Lottie's pack

Lottie found an Ichthyosaur on the Jurassic Coast, but the bones are scattered all over the place in the rocks. This tells us that when it died and sank to the bottom of the seabed, it was attacked by scavengers who tore the body apart and ate all the soft parts! Can you help her put the bones of this amazing fossil back together again?
