

Online Science Days 2026 to celebrate Scottish inventors

Inspirational Science Days
for the whole school

20 January: Live Day for primary schools

21 January: Live Day for nursery settings

22 January: Live Day for primary schools

Our award-winning teachers will deliver three live online lessons during the day for Early, First and Second Level learners, plus a standalone nursery session. Each lesson introduces a curriculum-linked investigation inspired by a Scottish inventor, using easy-to-source materials to engage every child. Class teachers support their pupils during the activity, and later in the day children from participating schools share their discoveries with others.

Included for each school:

- Three online lessons (Early, First and Second Levels)
- One nursery lesson (for participating nursery settings)
- Guidance pack with timings, Teams link and resource lists

For more information before booking, email tom.holloway@pstt.org.uk.
